SYNOPTIC SITUATION: Tropical Storm Ewiniar is currently located at 38.6 N, 150.0E and is moving slowly to the east. Expect partly to mostly cloudy skies today, and periods of light drizzle as the tropical storm moves away from the local area.

EXTENDED OUTLOOK: Tropical Storm Ewiniar will continue to move slowly to the east and dissipate. Expect partly to mostly cloudy skies, light rainshowers in the vicinity and overnight fog for Saturday, as the storm continues to dissipate. Sunday and Monday an upper level ridge will move into the area, expect partly cloudy skies and light overnight fog. A new frontal system will begin to move into the area on Tuesday bringing with it cloudy skies light rain and fog.
